

NAVIN KUMAR M S

Full Stack Developer

+91 6369477490 | navinms0111@gmail.com | Portfolio | LinkedIn | Tiruppur, Tamil Nadu, India

SUMMARY

Motivated and detail-oriented fresher Full Stack Developer with a strong foundation in building responsive, production-ready web applications using React, Node.js, Express, and MongoDB. Passionate about writing clean, efficient code and delivering seamless user experiences. Proficient in TypeScript, Tailwind CSS, JavaScript (ES6+), Redux, Zustand, JWT authentication, REST APIs, and Stripe payment integration. Eager to contribute to a dynamic team and grow through real-world challenges while applying modern development practices and Agile workflows.

TECHNICAL SKILLS

Languages	: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	: React.js, Next.js, Redux, Zustand, React Hooks, Tailwind CSS, Styled Components
Backend	: Node.js, Express.js, REST APIs
Database	: MongoDB, Prisma ORM, Redis
Tools & Platforms	: Git, GitHub, Vercel, Render, Vite, Webpack, Stripe API, Cloudinary
Core Concepts	: JWT Authentication, Component-Based Architecture, Responsive Design, Performance Optimisation, CRUD Operations, Agile Development

PROJECTS

Shop Sphere – Full Stack E-Commerce Platform

React.js | Node.js | Express | MongoDB | Redis | Stripe | Cloudinary | Zustand | Tailwind CSS | Render

<https://shop-sphere-1fzm.onrender.com/>

- Built a production-ready MERN stack e-commerce platform with product browsing, shopping cart, coupon system, and full order management.
- Implemented JWT authentication with refresh tokens and role-based admin access; integrated Stripe Payments & Webhooks for real-time transactions with discount support.
- Engineered an admin analytics dashboard with sales charts via aggregated MongoDB queries; used Redis for caching and Cloudinary for image management.

Weather App – Real-Time Weather Dashboard

React.js | JavaScript | OpenWeatherMap API | Geolocation API | Tailwind CSS | Vite | Vercel

<https://weather-app-iota-tawny-33.vercel.app/>

- Integrated OpenWeatherMap REST API using async/await to render live weather data with smart city autocomplete and dynamic backgrounds driven by real-time conditions.
- Implemented browser Geolocation API to auto-detect user location; managed state with React Hooks and optimised performance using Vite with cross-browser validation.

Job Application Tracker – Productivity Tool

React | TypeScript | Tailwind CSS | Local Storage | Vercel

<https://job-tracker-one-hazel.vercel.app/>

- Created a job-hunt management tool to log applications and track statuses (Applied, Interview, Offer, Rejected); built fully in TypeScript with Local Storage persistence.

EDUCATION

Manipal University Jaipur

Bachelor of Computer Applications (BCA)

Jaipur, India

Oct 2023 – Present

Vidya Mandir Matriculation Higher Secondary School

Higher Secondary Education (HSC)

Tiruppur, India

Jun 2019 – Apr 2020

CERTIFICATIONS

- The Complete JavaScript Course – Udemy
- The Ultimate React Course: Next.js, Redux & More – Udemy
- Complete Node.js Developer (GraphQL, MongoDB + more) – Udemy
- The Fullstack Developer Path – Scrimba
